Interactive Spectator Intro

- A cinematic intro explains the goals and capabilities of interactive spectator.

IntSpec_Intro

[CINEMATIC INTRO]

Interactive Spectator Intro

- User enters deploy map and sees a zoomed out overview of the map
- If available, a hub will have a highlighting effect on the hub icon on the map to indicate an action can be taken

IntSpec_Intro

Interactive Spectator Intro Pt. 2

- Before the user is able to move or select anything, the cursor automatically moves to highlight the available Hub
- Once highlighted the device icons appear, the POI is updated to be the bounds of the Hub and the camera zooms in more.
- Picture in Picture also appears as well as the "capture" CTA. PIP is showing a live preview of the location of the hub in the world
- Device icons may or may not have a red indicator on the icon that is meant to signify that there is activity on that device. Users cannot access the device until they capture the hub.
